

ASOW Suite GRC

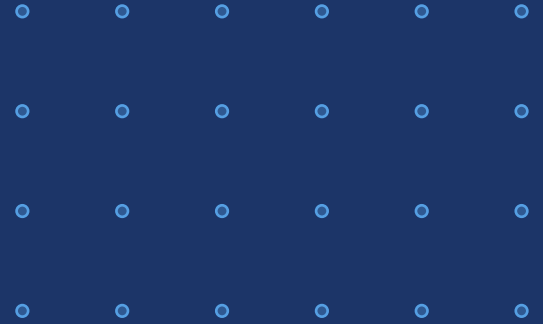

Quality Management Platform

The complete GRC platform for organizations that can't afford compliance gaps.

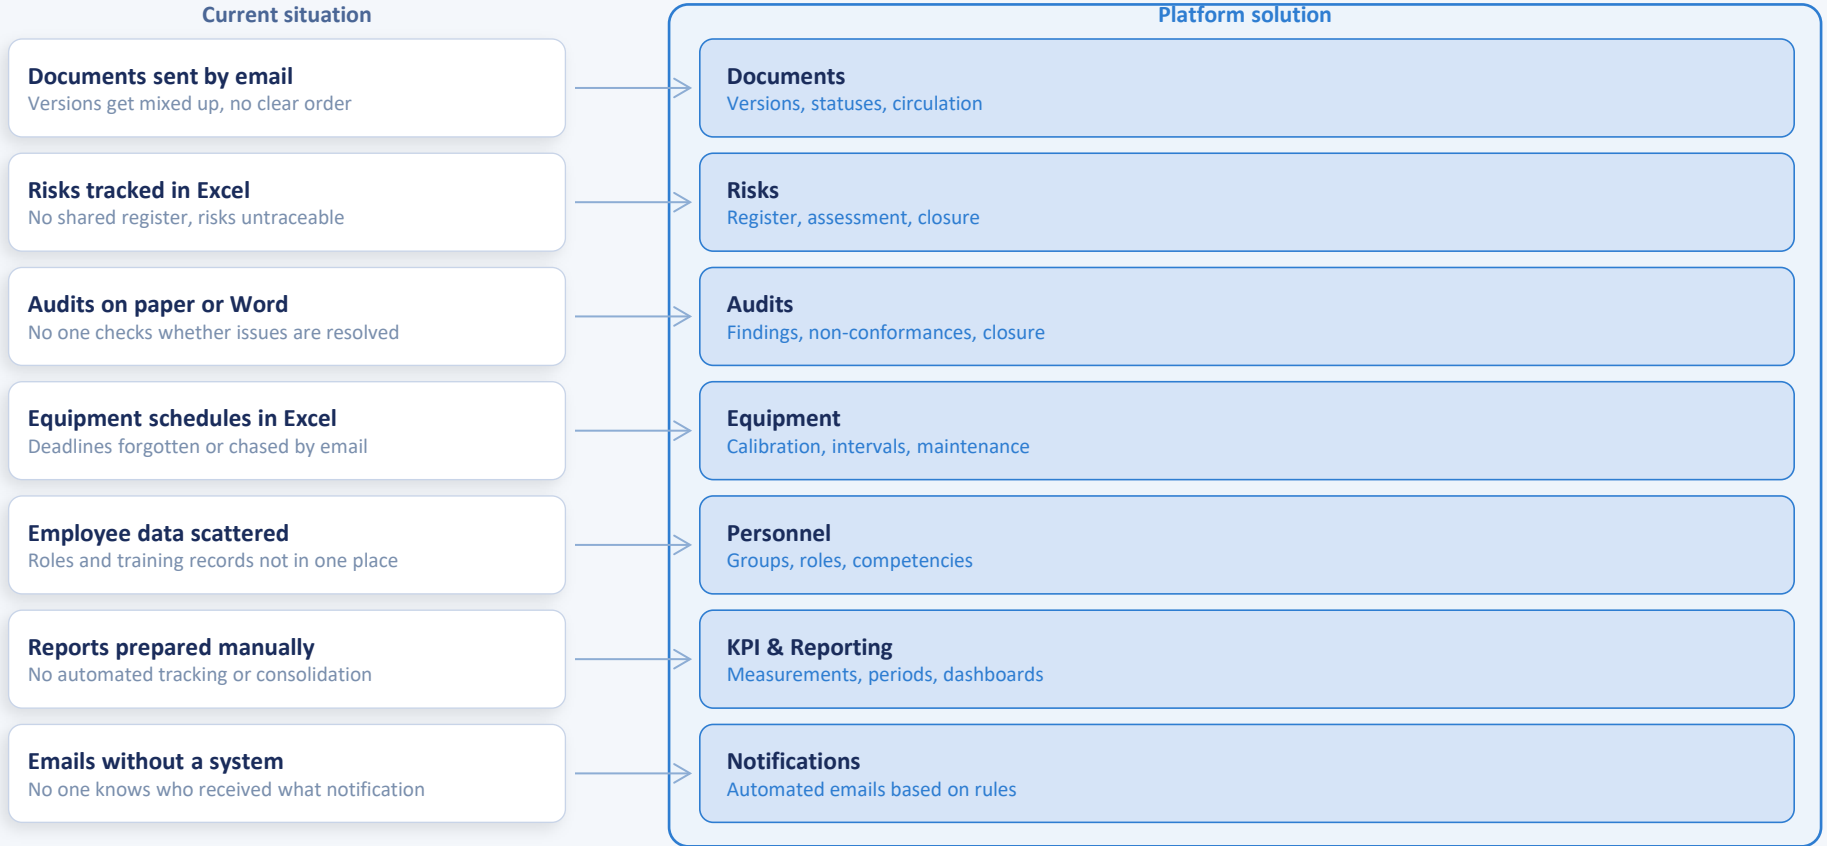

Centralized

Traceable

Compliant

When tools are fragmented, compliance suffers — and so does your team

One platform to replace the spreadsheets, emails and manual chasing

One platform. Two operating levels.

Daily operations and centralized administration work together in one connected ecosystem.

User level

- Prepare, review and approve documents
- Register risks, audits and non-conformances
- Track tasks, statuses and deadlines
- Access related records and context

Administration level

- Configure roles, permissions and access
- Set up structures, categories and workflows
- Manage statuses and classification logic
- Scale the platform to organizational needs

Ten interconnected modules on one platform

1 Documents

Versions, circulation, statuses

2 Risks

Register, assessment, closure

3 Audits

Findings, NC, traceability

4 Equipment

Calibration, intervals

5 Personnel

Groups, roles, competencies

6 Quality

NC, complaints, improvements

7 Standards

Requirements linkage

8 KPI

Measurements, periods, reports

9 Notifications

Automated email triggers

10 Reports

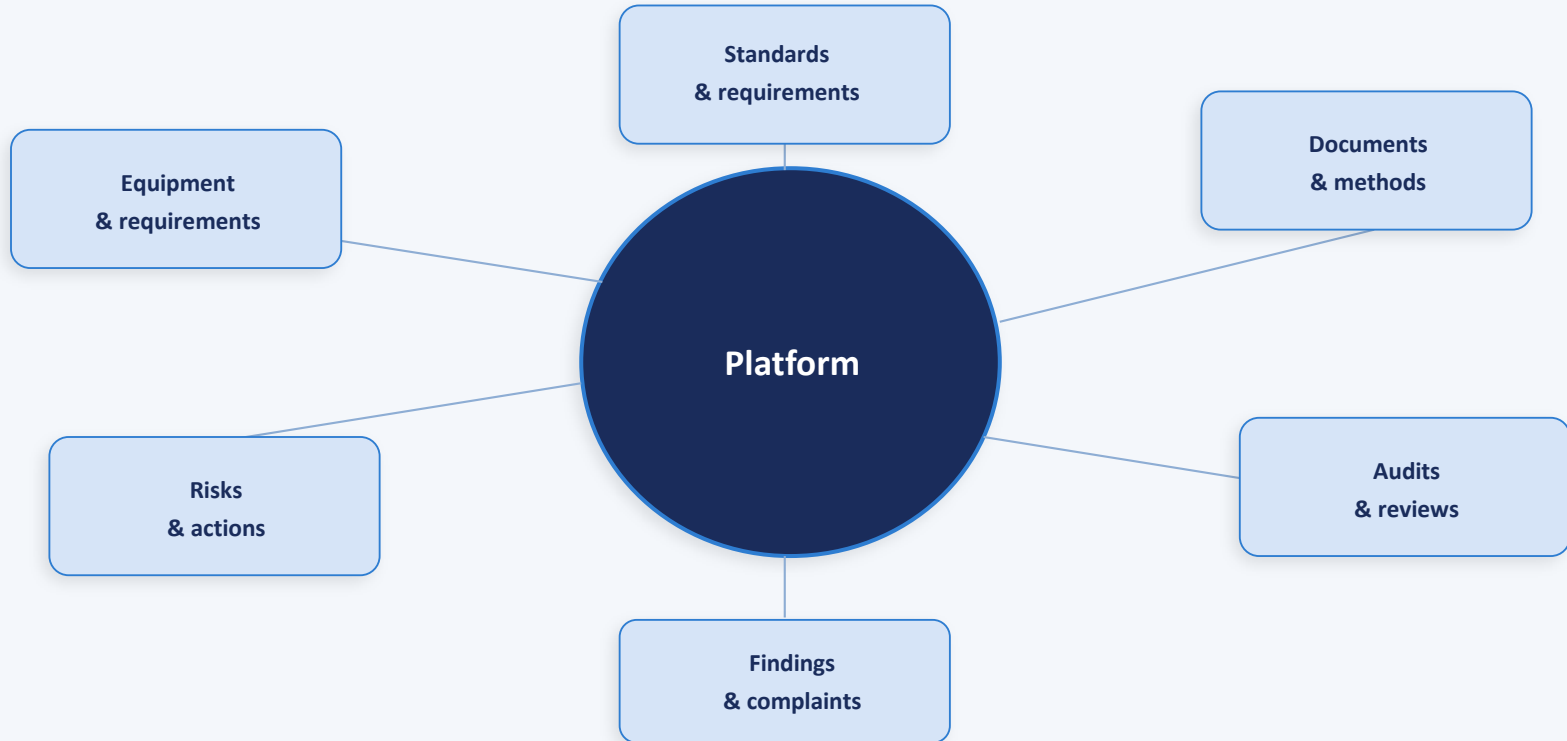

Dashboard, management oversight

Controlled lifecycle from creation to archive

Designed for daily work — not just for audits.

Records are not isolated — they form a unified traceability chain

Faster context

Understand a situation without additional requests

Less information loss

Traceability is preserved across the workflow

Better decisions

Connected records support root-cause thinking

What changes when everything is connected

1

Eliminate tool sprawl

Documents, risks, audits, equipment and personnel — consolidated in one governed environment.

2

Reclaim hours every week

No more copying data between tools, chasing reminders, or coordinating by email.

3

Zero gaps in your audit trail

Every action is linked to its source requirement — nothing gets lost between systems.

4

Accountability without micromanagement

Every task has a clear owner, status and deadline — visible without chasing anyone.

5

Always audit-ready

Evidence and history are always in place — no last-minute scramble before an audit.

6

Real-time oversight

Live dashboards and automated reports give leaders the picture they need — instantly.

Start in weeks, not months — and scale at your own pace

1 Prioritize

Identify the highest-impact area — documents, risks or audits — where control matters most today.

2 Configure

Configure roles, categories and workflows to match how your organization actually works.

3 Launch

Onboard key users quickly and go live — typically within a few weeks of kickoff.

4 Expand

Activate additional modules as your team is ready — no big-bang rollout required.

Low-risk, phased adoption — your team builds confidence as the platform grows with you.

ASOW Suite GRC

One system. Full control.

Documents. Risks. Audits. Equipment. Personnel.

See how ASOW Suite GRC works in an environment like yours.
